

Steps to access the interactive dashboard

1. Download both the Excel sheet and PowerBI dashboard provided. Save the Excel sheet in the *Downloads* folder.
2. Open PowerBI dashboard. Go to *Transform data* -> (tables would show error) -> *Browse Location* -> Select *Downloads* (where Excel is stored) -> Close *Transform data* -> *Refresh data*.
3. Open Excel sheet -> *input data* sheet -> Enter your analysis years and per day running kms -> *Save*.
4. Open PowerBI dashboard and *Refresh data*.
5. Dashboard now shows the data and provides you a solution for EV vs ICE.
